INDEX TO VOLUME LXIV 1996

Subjects

Accounting issues
financial views—winter 1995–1996, 225–228

Agriculture
cutbacks on agricultural use of water in California, 134–147
effects of mineral, oil and gas activities on value of agricultural land, 67–75

Appraisal
comprehensive view of valuation for risk assessment purposes, 288–294
free cash flow, 171–182

Appraisal firms
quality management in residential appraisal, 199–203

Appraisal report formats
compliance with USPAP; appraisals versus evaluations, 356–362

Appraisal standards
changes in 1994; levels of reliability, 356–362

Australia
use of NPV and GPV in the United States and Australia, 328–330

Below-market contract rent
"deficit rent"—proposal for new terminology to describe below-market rent, 107

Boundary lines
neighborhood or submarket and effect on property value, 241–245

Business enterprise value
defined as intangible value, 183–194
effect on going-concern value of hotels, 246–251
segregating from real estate value, 1–13

California
speculative subdivision valuation, 263–272
water crisis, 134–147

Cash flows (*see free cash flows*)

Casualty loss
effects on market value, 59–66

Chicago
effects of low-income housing on surrounding property values in, 27–33

Commercial Mortgage-Backed Securities (CMBS)
use of appraisals in forming CMBS, 223–224

Communication skills
writing narrative reports, 129–133, 252–262

Comparable sales adjustment
alternative methods for dissimilar-size comparables (e.g., derived per unit method, interpolation, land sale listings, and land value extraction method), 310–318

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 155–170

Computer-assisted real estate appraisal system (CAREAS)
automating the sales comparison approach method, 91–101

Consumer Price Index (CPI)
as a check on investment survey results; used for calculating rents and expenses, 221–222

Consumer sentiment surveys
to forecast housing starts, 343–350

Contaminated properties (*see also agriculture; EMF*)
equity and mortgage requirements in estimating risk-related effects on income capitalization rates, 44–58

Contingent valuation method (CVM)
alternative technique to CVM for valuing unique natural resources, 295–303

County lines
effect on property value, 241–245

Departure Provision
(in USPAP), revised 1994, 356–362

Depreciation
functional and economic obsolescence of extremely large buildings, 394–398

Discounted cash flow analysis
adjusting DCFs to reflect market cycle effects, 14–26
alternative method for subdivision valuation, 263–272
techniques used in timberland valuation, 399–405
used in valuing real estate investments and compared with dividend discount model (for stock valuation), 304–309

Discounted cash flow value (*see also gross present value [GPV]*)

Drought
water issues and real estate values in California, 134–147

Economic value
defined as physical (hard) asset; usefulness and importance to investor, 219–220

Electromagnetic radiation field (EMF)
property devaluation, 87–90

Eminent domain
in takings cases, 363–374

Employee Relocation Council
definition of market value, 204–214
ERC appraisal report, 215–218

Endangered Species Act
valuation of endangered species, 295–303
water crisis brought about by, 134–147

Environmental issues (*see also geotechnical problems; mineral, oil and gas activities*)
consideration of risks in environmentally impaired properties, 155–170
highest and best use of environmentally significant real estate (preservation use), 76–86
how EPA requirements affect availability of water, 134–147
income capitalization rates according to levels of contamination, 44–58
property values affected by EMF, 87–90
valuation of endangered species, 295–303

Ethics
factors that influence unethical behavior; studies on, 125–128

Evaluations
when to perform, 356–362

Expenses
use of CPI to calculate expenses, 221–222

External obsolescence
location, environment and economic (categories of external obsolescence), 148–154

Fannie Mae
definition of market value, 204–214
on subsequent sales, 102–104

FHA (Federal Housing Association)
definition of market value, 204–214

Financial issues
financial views—summer 1996, 432–435
financial views—winter 1995, 225–228

Forecasting methods
addressing economic and market cycle effects on value, rents, vacancies, expenses, and cap rates, 14–26
alternative method of cash flow analysis for subdivision valuation, 263–272
consumer sentiment surveys to forecast housing starts; diagnostic statistical tests, 343–350
Delphi survey method, 295–303
GIS applications to measure occupancy rates of warehouses, 416–422
principle of anticipating future returns, 219–220
rents for going-concern value of shopping malls, 1–13
risk assessment, 288–294
used in relocation appraisal, 215–218

Freddie Mac
definition of market value, 204–214

Free cash flows
as a measure of past, present and future earnings of a real property asset, 171–182

Future value
projecting changes in property value for investment purposes, 288–294

Geographic information systems (GIS)
for estimating occupancy rates of warehouses, 416–422

Geostatistics
economic analysis on impaired property valuation, 155–170

Geotechnical problems
post-repair diminution in value, 59–66

Going-concern value
compared with current market value of a business's real property, 183–194
segregating from real estate value of shopping center, 1–13
versus hard asset value in restaurant valuation, 406–415
versus real estate value in hotel valuation, 246–251

Golf courses
positive and negative impacts of frontage and proximity to residential property, 351–355

Gross living area
increase in size and corresponding change in unit value, 104–107

Gross present value (GPV)
versus net present value (NPV) and value-price differential (VPD), 328–330

Hard asset value
versus going-concern value in restaurant valuation, 406–415

Hedonic regression analysis (*see multiple regression analysis*)

Highest and best use
considerations in the valuation of special-purpose properties, 195–198
going-concern valuation, 183–194
of environmentally significant real estate, 76–86
of extremely large distribution buildings, 394–398

High-voltage power lines (*see EMF*)

Hotel valuation
allocating value among components of a going-concern, 246–251

Impairment
use of engineering impaired value model for property valuation, 155–170

Income capitalization approach
calculating the NPV of future benefits, 219–220
use of free cash flow analysis, 171–182
use of income approach in categories of external obsolescence, 148–154
used in highest and best use analysis of special-purpose properties, 195–198

Income demographic statistics
for retail inventory, 423–429

Index of Consumer Sentiment (ICS), 343–350

Index of Housing Sentiment (IHS), 343–350

Inflation
impact on real estate and bonds, 304–309

Institutional appraisal
diversification benefits of real estate, 304–309
financial views—summer 1996, 432–435
financial views—winter 1995–1996, 225–228
news from NCREIF—real estate securities, 223–224
news from NCREIF—valuation of partial interests, public market valuation-portfolio valuation methods, and mortgage and other financial instruments, 430–431

Intangible value (*see business enterprise value*)

Investment real estate
news from NCREIF—real estate securities, 223–224
news from NCREIF—valuation of partial interests, public market valuation-portfolio valuation methods, and mortgage and other financial instruments, 430–431

Investment surveys
compared with CPI figures, 221–222

Land expectation value
calculation of land expectation value as a standard DCF technique, 399–405

Landslides and mudslides (*see geotechnical problems*)

Large buildings
market behavior and factors of comparison in the appraisal of extremely large buildings, 394–398

Legislation
regulatory takings, 363–374

Lender issues
lending decisions regarding special-purpose properties, 406–415
risk assesment, 288–294
stating the impact of tax credits in market value in loan commitments, 273–278

Light industrial properties (*see warehouses*)

Limited appraisal
reliability of, 356–362

Liquor laws
effect on property value, 241–245

Locational adjustments
for positive and negative externalities of golf course frontage, 351–355

Logic
and critical reasoning, 129–133

Low-income housing (*see also low-investment grade properties*)
effects on value of surrounding properties, 27–33
inclusion of financial assistance in determining market value of low-income housing, 273–278

Low-investment-grade properties
physical and economic components of, 34–43

Market analysis
effects of low-income housing on surrounding property values, 27–33
how market cycles in real estate activity affect value and market rents, 14–26
of retail properties, 423–429

Market value
compared with going-concern value of a business's real property, 183–194
considerations for preservation use properties, 76–86
defined by FHLMC, FNMA, VA, FHA, ERC; comparable sales adjustments, 204–214
integrating unrealized potential uses for special-purpose properties to calculate market value, 195–198
market value loss due to golf course frontage, 351–355

Mineral, oil and gas activities
effects on agricultural land values and legal rights of owner and lessee, 67–75

Mortgage-equity analysis
to show value diminution caused by contamination, 44–58

Multiple regression analysis
used in CAREAS; also hedonic regressional analysis, 91–101

Multi-tenant properties
tax appraisals of, 388–393

Net and gross leases
in tax appraisals, 388–393

Net present value (NPV)
used in income capitalization approach, 219–220
versus gross present value (GPV), 328–330

Non-investment grade properties
physical and economic components of, 34–43

Non-realty value (*see also business enterprise value and going-concern value*)
segregating real estate value from non-realty value, 1–13

Paired sales analysis
problems in time adjustment techniques, 319–327

Power ratio
use of power ratio in market analysis, 423–429

Preservation use properties (PUP)
as highest and best use, 76–86

Professional development
factors that influence unethical behavior, 125–128
writing comparative analyses and correlations, 252–262
writing narrative reports, 129–133

Property rights
government power in takings cases, 363–374

Public interest value
judicial and legislative decisions regarding public use versus public interest value, 363–374

Real estate investment trusts (REITs)
news from NCREIF—use of appraisals in forming REITs and CMBS, 223–224
use of free cash flows in REITs, 171–182

Relocation appraisal
concept of anticipated sales price, 215–218

Remediation costs (*see also contaminated properties*)
considerations for impaired properties, 155–170

Rental rates
market cycle effects on, 14–26
use of CPI, 221–222

Residential issues
affordable housing tax credits, 273–278
comparable sales analysis, 204–214
consumer sentiment surveys to forecast housing starts, 343–350
effects of low-income housing on value of surrounding properties, 27–33
home values affected by golf courses, 351–355
quality management in residential appraisal, 199–203

relocation appraisal, 215–218
subdivision valuation, 263–272

Retail properties
market analysis of, 423–429

Riparian rights
guidelines for valuing potable water sources and systems, 279–287

Risk (*see also contaminated properties*)
consideration of risks in environmentally impaired properties, 155–170

Sacramento-San Joaquin Delta
availability of water in, 134–137

Safe Drinking Water Act (SDWA) of 1974, 279–287

Sales comparison approach
impropriety of using dissimilar-size comparable land sales, 310–318
use of sales comparison in categories of external obsolescence, 148–154
writing comparative analyses correlations, 252–262

School districts
effect of boundary lines on property value, city services, taxes, etc., within a school district, 241–245

Seller-financed properties
using cash equivalency adjustment to account for premium on low-investment-grade, seller-financed properties, 34–43

Shopping centers
setting mall rents based on nonrealty interests, 1–13

Special-purpose properties
valuation of restaurants, 406–415

Statistical analysis
using CAREAS, 91–101

Stigmatized properties
diminution in value of properties near power lines, 87–90

Subsequent sales (*see also contaminated properties and geotechnical problems*)
for use as primary market data, 102–104

Subsidence
suggestions for improving mineral owner and lessee relationship, 67–75

Takings
landmark court decisions in takings and regulatory takings cases, 363–374

Tax issues
changes to requirements of Tax Reform Act of 1986; inclusion of tax credits in valuation of affordable housing, 273–278
effects of boundary lines on property value within a tax district, 241–245
real estate tax recoveries in ad valorem tax appraisals; tenant and lessors' responsibilities, 388–393
tax deductions and reassessments based on stigma damages, 59–66

Technology
CAREAS, 91–101
GIS, 416–422

Time adjustments
sales assessment ratio technique for estimating sales price and assessed value changes over time, 319–327

Topographical value mapping
used in impaired property valuation, 155–170

Total quality management
strategies for improving customer service, 199–203

Unit value
increase in size versus corresponding change in unit value, 104–107

VA (Department of Veterans Affairs)
definition of market value, 204–214

Vacant parcel
using different-size parcels as comparables, 310–318

Value-price differential (VPD)
versus NPV and GPV, 328–330

Valuation
of agricultural land, 67–75
of apartments, using cycle valuation model, 14–26
of contaminated properties, 44–58
of endangered species, 295–303
of environmentally impaired properties, 155–170
of extremely large buildings, 394–398
of hotels, 246–251
of low-investment-grade apartments, 34–43
of potable water company, 279–287
of preservation use properties, 76–86
of restaurants, 406–415
of special-purpose properties, 195–198
of subdivisions, 263–272
of warehouses, 416–422

Warehouses
developing distance and regional variables of warehouse properties using GIS applications, 416–422
market behavior and factors of comparison in the appraisal of distribution facilities, 394–398

Water
availability of water and effect on market value, water rights, and water quality, 134–147

Wetlands (*see PUPs*)

Zoning (*see boundary lines*)

Cases in Brief

Changing area's border versus spot zoning, 331

Charitable organization not allowed to claim tax exemption for holding property solely for future development, 108

City's eminent domain power does not extend to donating land for construction of state prison, 437

Expert testimony concerning the future value of condemned property found invalid, 109

Improved school property found exempt from real property taxes, 108

Income approach essential in determining true value of office building, 229

Income approach is essential to valuation of shopping mall anchor store, 437

Nondiscrimination tax may be imposed on nonreservation commercial property owned by Indian community, 331–332

Nonprofit organization with emphasis on member services—rather than public services—claims tax exemption on its real property, 230

Owner held entitled to monetary recovery for value of interest taken in regulatory restriction, 109

Participation in section 42 low-income housing program subject to réstricted use and reduced assessed value, 436–437

Pollution control equipment is deductible from market value in tax assessment cases, 436

Reproduction or replacement cost less depreciation prevails over unit method of valuation, 229

Surrounding neighborhood must be considered in determining adjustment for tax assessment, 230

Tax-exemption granted to faculty houses for purposes incidental to education, 332

Taxation of conditional subdivision upheld, 331
